

# Innovative and proven pumping solutions for fish farming

The present and future design of offshore and onshore fish farms is efficient in terms of feed control, waste collection, and fish escape security. Sulzer offers several energy-efficient and reliable products to support these new and more environmentally-friendly production methods.

## Proven expertise

- Experience in managing a diversity of process liquids and application environments
- Superior application knowledge based on long experience
- Energy-efficient products with small life cycle costs and a lighter environmental footprint
- New solutions for your future applications

## Material competence

We have optimized the material selection for all kinds of pumping and mixing applications. Our process pumps are supplied with duplex steel as standard and we also have products available in cast iron, stainless steel, superduplex, SMO, titanium, etc.

## Key customer benefits

- Advanced materials and a wide range of pumps and mixers for seawater applications.
- Innovative shaft sealing solutions for reliable operation and reduced costs.
- Support and qualified services for the entire product lifecycle.
- Tailor-made product solutions with small total cost of ownership.

# Extensive product coverage

Through a wide portfolio, we propose to you the most adapted pumping, mixing and aeration solutions. Our high-efficiency products will improve the performance, reliability and sustainability of your fish farming plants.

## Process pumps

AHLSTAR process pumps

AHLSTAR self-priming and gas removal pumps

SNS process pump

SIL vertical inline pump

## Multistage pumps

VMS vertical multistage pump

## Specialty pumps

ZPP and SMD double-suction pumps

CAHR axial flow pump

## Vertical pumps

JTS standard vertical turbine pump

AGV vertical axial flow pump

NK/WK vertical sump cantilever pumps

## Submersible pumps

XRCP submersible recirculation pump

XFP submersible heavy-duty pump

VUPX submersible propeller pump

Submersible drainage pump XJ

Light drainage pump Robusta

## Submersible mixers

XRW submersible mixer

RW submersible mixer

## Agitators and mixers

SALOMIX and Scaba top-mounted agitator

SALOMIX and Scaba side-mounted agitators

## Grinders

Muffin Monster™ grinders

## Ejector

Ejector for priming

Sulzer ejector is used for self-priming applications. Suitable for all process and double suction pumps.
